YOUR PROFILING

Personal profiling is the first step in career planning. The purpose of profiling is to understand your current stage in career planning. It helps in defining your career objectives and roadmap. The ultimate aim of this process is to move you from your current stage of career planning to an optimised stage. Personal profiling includes information about your current stage, the risks involved, and an action plan for your career development.

Current Stage of Planning

Exploring

Exploring: You are at the exploring stage in career planning. We understand that you have a fair idea of a suitable career. At this stage, you have a better understanding of career options. However, you are looking for more information to understand the complete career path and an execution plan to achieve it. A lack of complete information and an execution plan can adversely impact your career. Most career decisions at this stage are based on limited information.

Risks Involved: Career misalignment, incorrect career path judgement, inaccurate career projections, and unnecessary stress

Action Plan: Explore career paths > Align your abilities and interests with the best possible career path > Create a realistic execution plan > Conduct timely reviews of the action plan

RESULT OF THE CAREER PERSONALITY

The Personality Assessment will help you understand yourself better. It will help you expand your career options in alignment with your personality. Self-understanding and awareness can lead you to more appropriate and rewarding career choices. The Personality Type Model identifies four dimensions of personality. Each dimension provides a clear description of your personality. The combination of your most dominant preferences is used to create your individual personality type. The four dimensions of your personality are shown in this chart. The graph below provides information about your personality type based on your responses. Each of the four preferences is derived from your answers and is represented through a bar chart.
